Aprameya – The Autonomous Systems Club
Engineering Tomorrow's Autonomy Today

Vision

To harness autonomous technologies, AI, and advanced computing to shape a smarter, safer, and more efficient world.

Mission

Aprameya Club is dedicated to building a collaborative community of enthusiasts in autonomous systems, where members can share knowledge, inspire each other, and work together towards common goals. Through hands-on experience, members engage in real-world projects focused on advancing autonomous technology, gaining practical insights into the field. The club prioritizes deepening expertise in critical areas like AI, Machine Learning, and the Internet of Things (IoT) to empower members with in-demand skills. Mastery of essential tools and frameworks, including ROS, TensorFlow, OpenCV, and various simulation environments, is a cornerstone of Aprameya's learning approach. To foster creativity and encourage continuous growth, the club promotes active participation in global competitions and hackathons, providing members with opportunities to innovate. Additionally, Aprameya places strong emphasis on partnerships with industry professionals and alumni, creating valuable pathways for guidance, knowledge-sharing, and networking to advance both individual and collective growth within the club.

Club Structure and Description

Aprameya - The Autonomous Systems Club is structured in a way that encourages everyone to work together, share ideas, and feel included. Although there are specific roles to help

manage tasks and keep things organized, the club values the input of every member. Decisions are made together, giving each member a chance to share their thoughts and contribute. This approach helps everyone feel connected and responsible for the club's success, making the club stronger and more united in achieving its goals and purpose.

Hierarchy of Aprameya Club | AY 2024-25

Roles and Their Responsibilities:

President

The President leads Aprameya with a focus on advancing the club's vision and mission. They oversee all club activities, ensuring alignment with objectives, and maintain a strong club culture by encouraging teamwork and open communication. The President manages club resources, organizes meetings, and coordinates efforts between various departments to achieve goals efficiently. They also collaborate with faculty advisors to keep activities in line with university policies and address any significant issues. As a role model, the President fosters a positive atmosphere that motivates members to stay active and engaged.

Vice-President

The Vice-President supports the President in all club operations, serving as a central coordinator and helping with strategic decision-making. They assist in planning events, managing resources, and ensuring policies and procedures are followed smoothly. The Vice-President also plays a key role in maintaining inclusivity within the club, encouraging members to participate actively and providing a welcoming environment for everyone. They often lead team-building activities and oversee daily operations to ensure club functions run effectively. Additionally, the Vice-President acts as a secondary contact for any club issues.

Director of Technology – Department of Technology

The Director of Technology oversees all technical activities within Aprameya, focusing on project execution, tech sessions, and skill-building. This role requires managing the tech stack, selecting appropriate tools, and organizing resources to support various technical projects. They are responsible for keeping members informed about industry trends, particularly in autonomous systems and AI, and providing firsthand guidance in technology sessions. Working closely with the Technical Chair, they ensure that projects meet technical standards and align with club objectives. The Director of Technology also mentors members, guiding them in building technical expertise.

Director of Research and Development – Department of R&D

The Director of Research and Development supports members in developing innovative research projects and guides them in methodologies, data analysis, and project execution. They collaborate with the research team to identify emerging trends and potential research opportunities in autonomous systems and AI. This director organizes research discussions, helps troubleshoot technical issues, and provides feedback on research proposals to enhance project quality. They also promote club research initiatives externally, enhancing the club's reputation in the academic community. By fostering a research-focused environment, they encourage members to explore and contribute to

technological advancements.

Director of Non-Technical Affairs - Department of Non-Tech and Planning

The Director of Non-Technical Affairs oversees all non-technical operations, including event organization, planning, and managing permissions for events. They develop and executing a schedule that supports the club's objectives, balancing technical sessions with social and team-building activities. This role also involves coordinating communication and resources for smooth event operations, ensuring that every detail aligns with the club's mission. Additionally, the Director of Non-Technical Affairs supports inclusivity by organizing social gatherings and creating opportunities for members to connect outside technical projects.

Lead of Designing

The Lead of Designing is responsible for creating visual content that represents the club's identity in a cohesive and appealing way. They design posters, presentations, and any visual materials needed for events, ensuring consistent branding and aesthetic quality. This role involves collaborating with event organizers to capture the essence of each event visually and providing design support across various projects. The Lead of Designing ensures that all designs are engaging, clear, and accessible to promote club activities effectively. They may also work with the Social Media team to produce visually appealing digital content.

Lead of External Relations

The Lead of External Relations manages Aprameya's connections with external entities, including alumni, industry professionals, and academic collaborators. They work to build partnerships, seek sponsorship opportunities, and secure guest speakers or industry experts for club events. This role involves networking, maintaining positive relationships with external stakeholders, and representing the club's interests professionally. The Lead of External Relations also coordinates with the Marketing and Social Media teams to

promote the club's visibility outside the university, enhancing networking opportunities for members.

Lead of Drafting

The Lead of Drafting is responsible for writing and editing content that represents the club's activities, achievements, and goals. They create content for newsletters, event descriptions, social media, and other communications, ensuring clarity and a consistent tone. This role involves collaborating with various teams to gather information and accurately portray the club's initiatives. The Lead of Drafting also reviews written materials before publication, ensuring accuracy and quality. Their work helps maintain clear communication within and outside the club, enhancing Aprameya's professional image.

Lead of Internal Relations

The Lead of Internal Relations focuses on fostering a positive and collaborative environment within the club and other clubs of the university. They ensure smooth communication among members, organize internal events, and encourage team bonding through regular meetings and discussions. This role involves addressing member concerns, creating a welcoming environment for new members, and organizing activities that promote engagement. The Lead of Internal Relations is also responsible for gathering feedback from members and sharing it with leadership to improve the club's internal operations and overall experience.

Projects Chair

The Projects Chair oversees the planning, execution, and successful completion of all club projects. They manage timelines, allocate tasks, and provide support to ensure projects are delivered on time and meet quality standards. This role involves close collaboration with the technical teams to guide project development, track progress, and resolve any challenges. The Projects Chair also encourages members to propose

innovative ideas and ensures that each team completes at least two projects per term, promoting an active, hands-on learning environment.

Tech Chairs

Tech Chairs are responsible for managing specific technical tasks within projects and supporting the technical learning of members. They lead technical workshops, provide guidance on project implementation, and help members build skills in relevant tech stacks. Tech Chairs also stay updated on modern technologies and share knowledge with the club, enhancing members' technical expertise. They coordinate with the Director of Technology to align projects with club objectives and ensure that each project meets technical standards.

Aspirants

Aspirants are new or junior members eager to learn and develop skills in autonomous systems and related technologies. They participate actively in projects, attend workshops, and seek guidance from senior members to build their technical and non-technical competencies. Aspirants are encouraged to ask questions, engage with various club activities, and explore areas of interest under the mentorship of experienced members. Through hands-on experience, they gradually take on more responsibilities, preparing them for future leadership roles.

Research Team

The Research Team is dedicated to exploring and developing innovative research projects aligned with autonomous systems and AI. Members conduct literature reviews, collaborate on research methodologies, and work on publishing findings in club-led initiatives or academic journals. They collaborate with the Director of Research and Development, focusing on emerging trends, data analysis, and research problem-solving. The Research Team also plays a role in presenting research outcomes at club meetings or events, contributing to the club's knowledge-sharing culture.

Design Chair

The Design Chair is responsible for maintaining the club's visual aesthetics across all digital and print platforms. They work closely with the Lead of Designing to create event posters, promotional materials, and any graphical elements required for presentations. The Design Chair ensures that all visual content reflects the club's brand, maintaining a consistent and professional appearance. This role involves brainstorming design ideas, collaborating with other teams, and assisting with any visual needs for the club.

Editing Chair

The Editing Chair reviews all written content to ensure accuracy, clarity, and professionalism. They edit event descriptions, newsletters, social media posts, and other communications to uphold the club's image. This role involves working closely with the Lead of Drafting and ensuring that all content aligns with the club's vision and mission. By maintaining high editorial standards, the Editing Chair ensures that all published content is clear, impactful, and polished.

Marketing Chair

The Marketing Chair is responsible for promoting the club's events, activities, and achievements to a wider audience. They work on strategies to increase engagement, attract new members, and enhance the club's visibility within and outside the university. This role involves coordinating with the Social Media team, creating promotional materials, and identifying opportunities to share the club's successes. The Marketing Chair also monitors engagement metrics to refine marketing strategies and expand the club's reach.

Broadcasting Chair

The Broadcasting Chair manages all real-time communication during events, ensuring

smooth information flow and updates. They handle live broadcasts, announcements, and internal communications, keeping all members informed and engaged. This role is essential during events to keep attendees aware of schedules, essential information, and any last-minute updates. The Broadcasting Chair also coordinates with the Marketing team to share live updates on social media platforms.

Social Media Marketing Chair

The Social Media Marketing Chair handles the club's social media presence, creating and scheduling posts, sharing event updates, and engaging with followers. They work on maintaining an active online presence and promoting the club's achievements to a wider audience. This role involves coordinating with the Design Chair to ensure visuals align with the club's brand and with the Marketing Chair for content ideas. The Social Media Marketing Chair monitors online engagement and looks for ways to grow the club's online following.

Drafting Chair

The Drafting Chair is responsible for creating and refining written content for various platforms, from newsletters and social media posts to event descriptions. They ensure that all club communications are informative, clear, and engaging, providing members and the public with accurate insights into club activities. The Drafting Chair collaborates with the Editing Chair to uphold high editorial standards and maintain consistency in the club's messaging.

Mailing Chair

The Mailing Chair handles all official club correspondence, managing email communications with members, faculty, and external partners. They are responsible for sending out event invitations, newsletters, and important updates, ensuring that information is distributed accurately and on time. This role involves managing the club's mailing list, addressing member inquiries, and maintaining a professional tone in all

correspondence.

Digital Data Chair

The Digital Data Chair oversees the club's data management, ensuring that all digital assets and records are well-organized and accessible. They manage data storage, maintain records of past projects and events, and ensure that all data is securely stored. This role involves coordinating with different teams to collect and store relevant information, making it easy to access historical data for future reference. The Digital Data Chair also ensures data privacy and security, aligning with best practices in digital information management.

Work Etiquette for Aprameya Club Members

Professional Communication

Use respectful, inclusive, and concise language in all communications, whether internal or external. For written communications, especially emails, follow a professional format, and check for clarity and correctness before sending. When addressing or responding to others, make sure to acknowledge their contributions and encourage open dialogue.

Punctuality and Reliability

Attend all meetings and events on time. Notify the relevant lead or team member in advance if you will be late or absent. Complete assigned tasks by the agreed deadline and promptly update your team lead or chair on progress or any delays. For time-sensitive matters, communicate proactively to ensure that projects and events stay on schedule.

Respect for Roles and Responsibilities

Value each member's role and responsibilities. Allow leads, chairs, and team members to fulfil their duties without micromangement. For project or event-related tasks, adhere to established workflows and follow the guidance of the respective team lead. Avoid overlapping or duplicating efforts—coordinate and clarify roles with your team to maintain efficiency.

Collaboration and Inclusivity

Embrace a collaborative approach in all activities; contribute ideas and provide constructive feedback to enhance team efforts. Recognize and respect diverse opinions, skill sets, and perspectives; create an inclusive environment where everyone feels comfortable participating. Ensure tasks are delegated equitably, and support team members when necessary to build a united, productive team.

Commitment to Club Values and Vision

Align your work with the club's mission of promoting innovation, research, and development in autonomous systems. Engage actively in club activities and prioritize tasks that advance the club's long-term vision and objectives. Be mindful of the club's image when interacting with external parties, representing Aprameya with integrity and professionalism.

Adaptability and Open-Mindedness

Remain open to feedback and adapt to changes in project goals, schedules, or club

direction, as necessary. Use setbacks or challenges as learning opportunities and encourage fellow members to do the same to foster a growth-oriented environment.

Clear and Transparent Reporting

Document all significant activities, decisions, and progress accurately. Share updates with your team to maintain transparency. Use established communication channels for documentation, such as group emails, shared folders, or meeting minutes. Keep records of past projects accessible for future reference, allowing for continuity and knowledge sharing across terms.

Respect for Confidentiality and Data Privacy

Oversee all club data, member information, and project details with confidentiality, sharing information only with authorized members. Maintain secure storage for digital assets, following best practices in data management as overseen by the Digital Data Chair. Ensure compliance with the club's privacy policies when interacting with external parties.

Commitment to Self-Improvement and Skill-Building

Regularly seek opportunities to gain experience, grow, and contribute latest ideas to the club, particularly in your area of responsibility. Attend workshops, technical sessions, and events organized by the club to enhance your skill set and support the club's mission of growth and innovation.

Positive Representation of the Club

Uphold Aprameya's values in all activities, both within and outside the club, creating a welcoming and positive environment for new members and external contacts. Approach external networking or partnership opportunities with professionalism, aligning your interactions with the club's goals and vision.
